

# ALL FLORIDA ORTHOPAEDIC ASSOCIATES

-----An Orthopaedic Center of Excellence -----

## All Florida Orthopaedic Associates (AFO) operational guidelines for preventing COVID-19 outbreaks

- On site temperature screener kiosk.
  - Administering and interpreting the temperature of an all individual utilizing infrared thermometers according to the manufacturer's instructions and CDC guidance for personal protection.
  - Screen visitors and staff using the health and travel history declaration form/questionnaire.
- Personal protective equipment is provided to all healthcare workers with direct contact to patients.
- All employees and patients of AFO business are required to wear a face covering while in areas of business.
  - **"Face covering"** means:
    - personal protective equipment that covers the mouth and nose;
    - a cloth face covering that covers the mouth and nose
- Approximately 30 additional hand sanitizing stations have been installed across the facility
- Routine building environmental prevention practices such as cleaning and disinfection with Cavidice and/or alcoholic based solution, performed more that one time daily during regular business hours.
- Limited foot traffic between the three floors.
- To preclude the need to touch handles, all clinic doors are propped open.
- Front Desk protective barriers installed in order to prevent spreading germs while communicating with patients.
- Front Desk area are is cleaned after each patient check in/out visit
- With a few exceptions, only patients are allowed in the clinic area (lobby, exam rooms) until further notice.
- Vendors/visitors are not allowed on the premises until future notice.
- Social Distancing measures have been taken by removing the furniture from the lobby to allow 6 feet of separation between the patients.
